Significant Fire Potential

Valid For: Tuesday, September 20, 2022

Issued On: Friday, September 16, 2022 04:30 PM (MT)

Map produced by the USDA Forest Service Geospatial Technology and Applications Center in coordination with the National Predictive Services Program

This map is intended as a significant fire potential forecast for the specified date based upon available data and information. Using this map for other than its intended purpose may yield inaccurate or misleading results. The Predictive Services Program attempts to use the most current and complete geospatial data available. Geospatial data accuracy may vary by theme on this map. The Predictive Services Program reserves the right to correct, update or modify geospatial inputs to this map without notification.

Significant Fire Potential

High Risk Triggers

- H: Hot & dry
- U: Unstable
- W: Windy
- D: Dry
- L: Lightning
- R: Recreation
- B: Burn Environment

High risk denotes either dry or very dry fuel conditions coupled with a potential ignition trigger and/or one or more critical burn environment factors.
